No Ordinary Evacuation Exercise

# EVAC<sup>plus</sup>

Real World

## Evacuation Exercises

Most organisations find it difficult to engage staff in regular evacuation drills, going through the same tedious process time and again.

Furthermore, most evacuation drills today do not simulate reality, leaving the participants no better off should a real situation occur. This is even more significant for high risk industries and those organisations with public safety high on the agenda.

### No ordinary evacuation exercise

The RiskLogic **EVAC<sup>plus</sup>** program brings more realism to your evacuation drills by utilising structured scenarios, props, smoke machines, casualty simulation and body makeup to create a mock real life disaster.

Each and every drill challenges your warden teams, first aid officers and general staff, testing their skills, knowledge and attitude towards a disaster.

### EVAC<sup>plus</sup> Benefits

- New and exciting approach to attract greater participation from all levels of staff.
- Higher level of learning and retention.
- Ensures a more focused and comprehensive test of your emergency preparedness.
- Compliments your existing AS3745 compliance.
- Supports a "we care attitude" to employees and building occupants.
- Integrates into existing programs and related tests.
- Scalable for any sized organisation and event.
- Greater realism resulting in high levels of confidence in your organisation.

### About RiskLogic
