

Mid Level .NET Application Developer (Full-time, Sydney)

1. Are you passionate about innovation and meaningful technology?
2. Do you have excellent .Net skills and experience in building new software products?
3. Do you want to work for an organisation that makes a real difference in our communities?

Then look no further; this position may be just for you! This is a fantastic opportunity for a motivated and self-driven .NET Application Developer to join a dynamic team during an exciting expansion phase of our technology division. This is a key role with tremendous scope to help build and grow our in-house technology into a global success.

Our vision is to work with inspired people to build meaningful organisations that contribute to a better tomorrow. At RiskLogic we do this every day by empowering people to successfully navigate the worst of situations, events like cyber-attacks, terrorism, physical disasters, health epidemics to name a few. With the right tools, training and experience we help people safeguard what's important to them, helping to build a more Resilient Future.

RiskLogic is a market leading consulting and technology company that works with corporate, not-for-profit and government clients throughout Australia and New Zealand. Our team makes a real and tangible difference to our clients and their success in a constantly changing threat environment.

As our .NET Application Developer, you will be responsible for the software development of our applications and implementation of new features, enhancements and improvements to existing systems. Your exceptional communication and technical skills will see you contribute to the development team to ensure that solutions meet business needs, and provide input to the direction of the software and new technologies.

Key Responsibilities:

- Development of our software solutions as per the business requirements and the delivery of solutions
- Work effectively within the technology team demonstrating excellent communication, collaboration and commitment
- Manage own workload and deliver solutions within agreed timeframes
- Apply quality control standards to the design and development of solutions
- Contribute to the development and implementation of the technology strategy and delivering the software roadmap

To be considered for this role you must have:

- Bachelor's or Post graduate degree in information systems
- 4-5 years experience working as a .Net developer
- Excellent time management skills
- Exceptional communication (both written & verbal) skills
- Proactive and self-motivated with a can-do attitude
- Strong analytical and troubleshooting skills
- An eye for detail and commitment to delivery quality solutions
- A passion for technology, innovation and continual learning

Essential Skills:

- MS .NET Technologies, ASP.NET MVC 4 or above, C# 4.0, Entity Framework 5 or above, SQL Server 2012 and above, Web APIs/Web Services/REST, JQuery, Bootstrap 4, Angular JS (desirable) and mobile application platforms (desirable).

Work with us!

We're a team of diverse and passionate enthusiasts. Everyone is empowered by exploring and implementing innovative ideas and improvements. We're growing, which means lots of opportunities and we make these opportunities real by helping you get there. We thrive and collaborate in an open activity based workspace, utilise the latest technologies and provide a great culture for you to thrive in. As an integral member of the team, you'll model our core values with your words and actions: **Integrity. Passion. Innovation. Performance.**

If this role sounds exciting and you have the skills and attributes we are looking for, please send your resume and a covering letter today. To find out more, you can contact Iolanda Hazell on 0400 489 743 or ihazell@risklogic.com.au
